# ABOUT US

For more than 40 years, the Rømer family has been at the forefront when it comes to organic foods. In the form of health food, as well as confectionery, energy bars and all kinds of beverages.

With Rømer Plantbased, the journey has come to vegan foods, which of course are of the same high quality, that has characterized the organic Rømer products over the years. Carefully selected ingredients, processed as carefully as possible, and all organic where possible, of course.

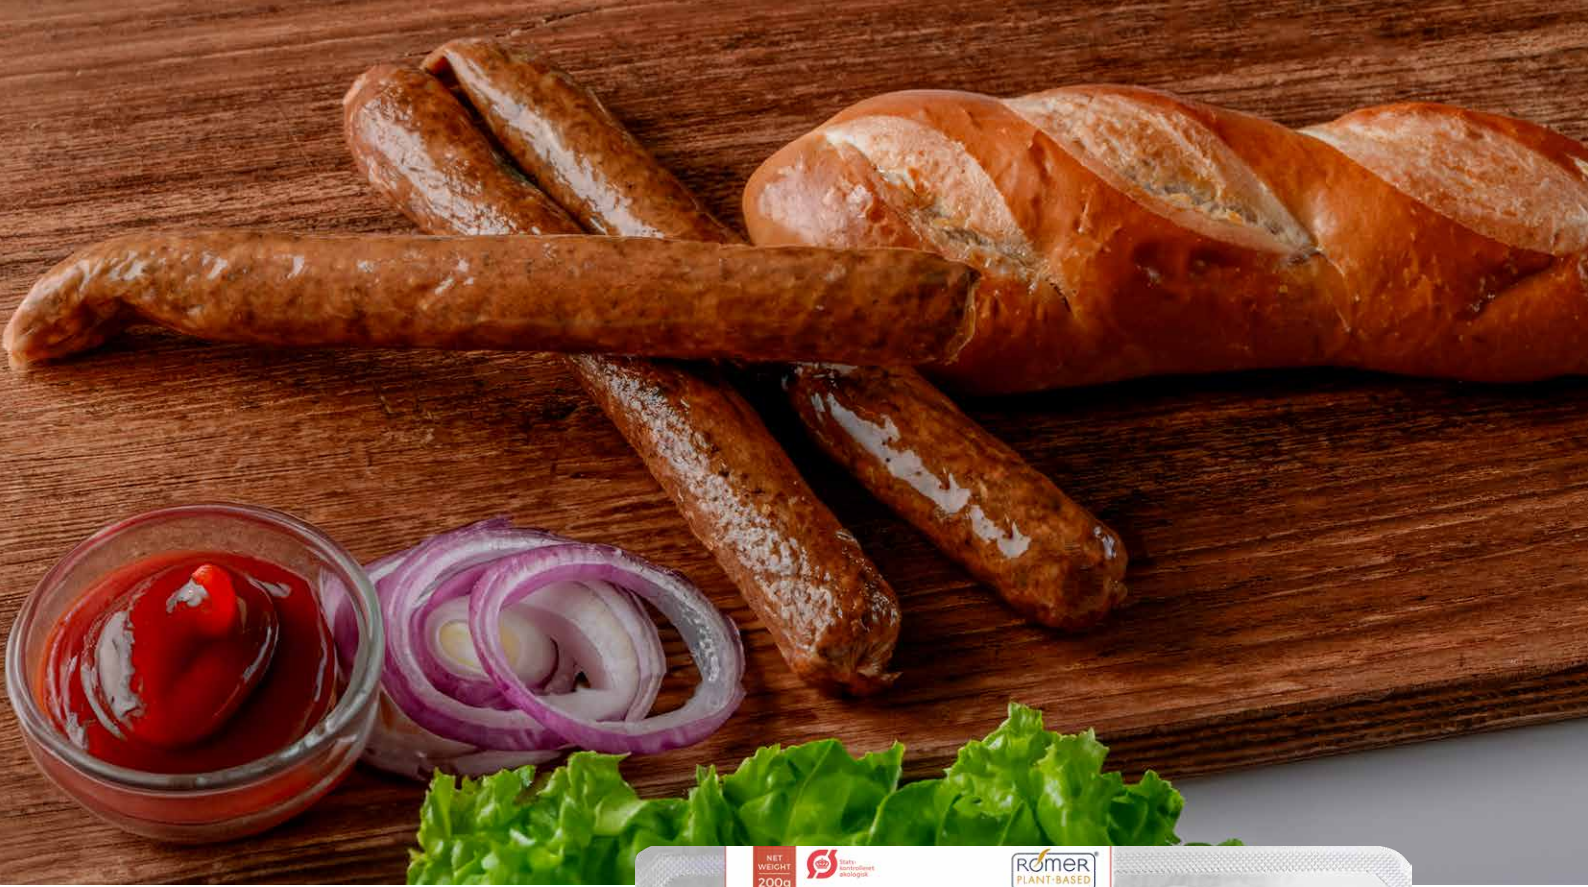

Rømer Plantbased was launched at the end of 2019 with a product range that initially includes falafel, burgers and grilled sausages, and the series will be continuously expanded with new variants.

With the long-standing knowledge of raw materials and spices, tasty - as it is recognized and characteristic of all the Rømer family's organic products - is of course consistently in the Rømer Plantbased series, but sustainability is also a high priority.

*We welcome You  
to a Universe of  
Green Alternatives*
